| Single-Hose Design                            | ✓                                                      |                   |                        | • The only patented single-hose design eliminates multiple connection points and additional maintenance.  
  • Allows for greater postural flexibility and freedom of motion.                                                                                                                                                                           |
| Hose Attachment at Bottom of Garment          | ✓                                                      |                   |                        | • Users enjoy a freer range of motion.  
  • Upward air flow emulates coughing action and provides effective treatment without pounding directly on the chest.                                                                                                                   |
| Open System with Active Inflate/Active Deflate | ✓                                                      |                   |                        | • Patented Soft Start® acclimates patient to therapy more easily than competitor devices.  
  • Allows the garment to contour with the chest cavity and the pulse amplitude to remain constant during inhalation and exhalation. Provides a soft, comfortable hug versus an uncomfortable "bear hug" throughout the respiratory cycle. |
| Dual-Stage Air Filter                         | ✓                                                      |                   |                        | • Minimizes transfer of dirt and debris through the device.                                                                                                                                                                      |
| Lifetime Warranty                             | ✓                                                      | Limited           | Limited                | • Only lifetime warranty among leading HFCWO devices.                                                                                                                                                                         |
| Soft-Fabric Shell                             | ✓                                                      | ✓                 | ✓                      | • Designed to fit like a piece of clothing.  
  • Adjustable Velcro®-like closures for ease of use and a custom fit.                                                                                                                                                            |
| Easy-Read, All-Position Display               | ✓                                                      |                   |                        | • Readable with generator in either a horizontal or upright position.                                                                                                                                                         |
| Save/Restore Functionality                    | ✓                                                      |                   |                        | • The only HFCWO device that allows the patient to adjust settings and easily restore the last saved.                                                                                                                      |
| Pause Feature                                 | ✓                                                      | ✓                 | ✓                      | • Allows patient to easily pause treatment while performing directed huffing and coughing.                                                                                                                                   |
