

Could SmartVest Be the Right Option for Me?

Need help managing symptoms from your chronic lung condition so you can get back to doing the activities you enjoy? Just follow these 3 simple steps to start the process of learning more about how SmartVest could help.

Step 1:

TALK TO A PATIENT CARE ADVOCATE

Whether you need help finding a doctor, would like an informational patient packet mailed to you, or are curious about insurance coverage, our Patient Care Advocate team is a great resource and can't wait to get to know you better!

Instead of navigating through a call center or sending an email to a generic address, you get to talk to a real person, who is a Patient Care Advocate and Respiratory Therapist.

[Schedule a time to chat >](#)

[Or call directly at 1.855.528.5690](#)

Step 2:

TALK TO YOUR DOCTOR

SmartVest helps people who are living with COPD, bronchiectasis, and other respiratory conditions reduce symptoms of recurring mucus buildup so they can breathe easier and live better.

At your appointment, bring along your **patient packet** and write down any additional questions you have for your doctor about getting a prescription.

Step 3:

GET A PRESCRIPTION

Once your doctor submits your prescription, the SmartVest team will contact you to help customize and ship your SmartVest to you.

If questions come up after your appointment, **reach out to your Patient Care Advocate** for guidance.

WHAT PATIENTS HAVE TO SAY:

"It's a great company to deal with. Employees are so very nice to talk to and very helpful; answered all my questions and said to call if I have more. **Could not say enough about this wonderful company!**" - GAIL

"I cannot speak highly enough of the company AND the positive improvement to my health and day-to-day life. Call them. **Their generosity with me moved me to tears**, and I am not a crier. **My life improved significantly with this machine.** The SmartVest has kept me out of the hospital." -PAMELA
