

SmartVest Connect®

# Simply Smarter HFCWO Therapy

SmartVest® SQL® with SmartVest Connect, created for healthcare teams and therapy users.

**Collaborative:** track and report on performance so you can make treatment decisions together.

**Simple:** in-home training by an Electromed team member with an app for therapy users and an online portal for care teams.

**Effective:** watch as the therapy plan progresses and clears airways, the key to feeling better and improved quality of life.

AIRWAY CLEARANCE SYSTEM

➤ Make informed decisions about  
HFCWO therapy with SmartVest Connect

# SmartVest Therapy. Your Way.

SmartVest SQL paired with SmartVest Connect gives healthcare teams and therapy users access and insights into therapy performance.

Easy-to-read goal reports provide in-depth insights into a therapy plan.

Notes and emoticon feeling ratings make it easy to track progress.

Wireless technology made simple: just plug it in and open the app.

Therapy users can download the free SmartVest Connect app for iOS and Android. With Bluetooth® pairing, the app seamlessly connects with the SmartVest SQL generator.

A real-time SmartVest Score, therapy reminders, and emoticon feeling ratings give therapy users a way to track their therapy plan's progress and communicate with their care team. Care teams can then review use, respond to notes, and recommend therapy adjustments.

SmartVest Connect. The easy way to track therapy and breathe easier.

**"Breathing easier makes a huge difference in quality of life."**

— Roberta, spouse of a SmartVest user
