HEAR FROM SMARTVEST USERS

For people living with COPD, bronchiectasis, or other chronic lung conditions, high frequency chest wall oscillation (HFCWO) therapy is an effective treatment option that may help relieve symptoms and get them back to doing the activities they enjoy.

SEE THE SMARTVEST DIFFERENCE.

“I started out using it twice a day and now I’m using it once a day or every other day. Such a big difference in how I feel.”

Charles

– QUALITY OF LIFE –

Lung problems have been with me for about 30 years. I’ve had to miss work, been hospitalized. I saw an ad about SmartVest and bronchiectasis and went to the website to read about it. I immediately made an appointment with my doctor to see if I would benefit. I DID QUALIFY! After that initial treatment, I was able to go grocery shopping without using oxygen. Each day I use it, I get better results.”

Shirley

“The difference is amazing. We haven’t had any respiratory infections, she hasn’t had to be on antibiotics, and I know that she is getting the best possible treatment and prevention possible. Thank you, SmartVest, for finding a way to treat patients big and small. I know that we will have more tomorrows because of SmartVest!”

Kristin

“

– REDUCED HOSPITALIZATIONS –

“I’ve had [my SmartVest] for 4 years, I use it at the same time as my nebulizer treatments. Insurance covered all of it and **it has made a world of difference. No hospital admissions since I began using it.**”

Sharee

“I wear it twice a day for 20 minutes each time — it has been a godsend and **totally turned my life around.** I have said it saved my life as I constantly was in the hospital with lung infections. Now, I still do the two treatments daily as ordered by my doctors and **haven’t been in the hospital in seven years!**”

Diane

“Last year I had four hospitalizations. I got my SmartVest towards the end of last year. **Not only am I much more comfortable, but I haven’t been in the hospital at all this year.**”

Jean

– EFFECTIVE AIRWAY CLEARANCE –

“I started using SmartVest about three years ago. Before I started using it I couldn’t make it up the stairs or do any kind of activities like swimming. I was always out of breath. I do get a lot of mucus and **the vest helps with this so much. I now have my life back!**”

Liz

“I have two pulmonologists. One said he didn’t think it would make a difference. The other was insistent I try it. I went 2 years and never slept a night through. After using the SmartVest for less than 2 weeks **I was able to sleep. Life changer for me.**”
